

# Serco Increases Efficiency by 85% and Global Revenue by 5% with AutogenAI

With AutogenAI, organizations are unlocking unprecedented levels of efficiency. Serco deployed AutogenAI for knowledge management and collaboration, supporting Serco's work with governments in over twenty countries.

By integrating AutogenAI into their workflow, Serco was able to streamline its knowledge management processes, reducing the time and effort required to access and organize crucial information 85%.

This increase has allowed Serco to allocate more resources towards other essential areas of their business. In their 2023 Annual Report, Serco credited AutogenAI for enhancing company-wide productivity and ultimately improving overall performance.
